

## SAFETY DATA SHEET Synthetic Polymeric EP Grease NLGI #1

According to Appendix D, OSHA Hazard Communication Standard 29 CFR §1910.1200 and WHMIS 2015, in compliance with the Hazardous Product Act (HPA, as amended) and the requirements of the Hazardous Product Regulations (HPR).

| 1. Identification                |   |
|----------------------------------|---|
| Product identifier               |   |
| Product name                     | Synthetic Polymeric EP Grease NLGI #1   |
| Product number                   | GPTR1   |
| Recommended use of the che       | emical and restrictions on use  |
| Application                      | Lubricating grease.   |
| Uses advised against             | No specific uses advised against are identified.  |
| Details of the supplier of the s | afety data sheet  |
| Supplier                         | AMSOIL INC.<br>Bordner, Ladner, Gervais<br>Scotia Plaza, 40 King St W<br>Toronto, ON, Canada M5H 3Y4<br>T: +1 416-367-6547                        |

#### Description of first aid measures

General informationGet medical attention immediately. Show this Safety Data Sheet to the medical personnel.InhalationRemove affected person from source of contamination. Move affected person to fresh air and<br/>keep warm and at rest in a position comfortable for breathing. Maintain an open airway.<br/>Loosen tight clothing such as collar, tie or belt. When breathing is difficult, properly trained<br/>personnel may assist affected person by administering oxygen. Place unconscious person on<br/>their side in the recovery position and ensure breathing can take place.

| Ingestion                        | Rinse mouth thoroughly with water. Give a few small glasses of water or milk to drink. Stop if<br>the affected person feels sick as vomiting may be dangerous. Do not induce vomiting unless<br>under the direction of medical personnel. If vomiting occurs, the head should be kept low so<br>that vomit does not enter the lungs. Never give anything by mouth to an unconscious person.<br>Move affected person to fresh air and keep warm and at rest in a position comfortable for<br>breathing. Place unconscious person on their side in the recovery position and ensure<br>breathing can take place. Maintain an open airway. Loosen tight clothing such as collar, tie or<br>belt. |
|----------------------------------|---|
| Skin Contact                     | Wash skin thoroughly with soap and water. Get medical attention if symptoms are severe or persist after washing.  |
| Eye contact                      | Rinse immediately with plenty of water. Remove any contact lenses and open eyelids wide apart. Continue to rinse for at least 20 minutes.   |
| Protection of first aiders       | First aid personnel should wear appropriate protective equipment during any rescue. If it is suspected that volatile contaminants are still present around the affected person, first aid personnel should wear an appropriate respirator or self-contained breathing apparatus. Wash contaminated clothing thoroughly with water before removing it from the affected person, or wear gloves. It may be dangerous for first aid personnel to carry out mouth-to-mouth resuscitation.   |
| Most important symptoms and      | l effects, both acute and delayed   |
| General information              | See Section 11 for additional information on health hazards. The severity of the symptoms described will vary dependent on the concentration and the length of exposure.  |
| Inhalation                       | Prolonged inhalation of high concentrations may damage respiratory system.  |
| Ingestion                        | May cause discomfort if swallowed.  |
| Skin contact                     | Prolonged skin contact may cause temporary irritation. Repeated exposure may cause skin dryness or cracking.  |
| Eye contact                      | A single exposure may cause the following adverse effects: Redness. Irritation.   |
| Indication of immediate medic    | al attention and special treatment needed   |
| Notes for the doctor             | Treat symptomatically.  |
| 5. Fire-fighting measures        |   |
| Extinguishing media              |   |
| Suitable extinguishing media     | Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water fog. Use fire-<br>extinguishing media suitable for the surrounding fire.  |
| Unsuitable extinguishing media   | Do not use water jet as an extinguisher, as this will spread the fire.  |
| Special hazards arising from t   | he substance or mixture   |
| Specific hazards                 | None known.   |
| Hazardous combustion<br>products | Hydrocarbons. Carbon monoxide (CO). Carbon dioxide (CO2). Oxides of nitrogen. Oxides of sulfur. Metal oxide(s).   |
| Advice for firefighters          |   |

| Protective actions during firefighting        | Avoid breathing fire gases or vapors. Evacuate area. Cool containers exposed to heat with water spray and remove them from the fire area if it can be done without risk. Cool containers exposed to flames with water until well after the fire is out. If a leak or spill has not ignited, use water spray to disperse vapors and protect men stopping the leak. Control run-off water by containing and keeping it out of sewers and watercourses. If risk of water pollution occurs, notify appropriate authorities. |
|---|---|
| Special protective equipment for firefighters | Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective clothing. Standard Firefighter's clothing including helmets, protective boots and gloves, that provides a basic level of protection during chemical incidents is defined by the Canada Occupational Health and Safety Regulations, by provincial guidelines on occupational health and safety or by NFPA standards if applicable.   |

6. Accidental release measures

#### Personal precautions, protective equipment and emergency procedures

| Personal precautions                   | No action shall be taken without appropriate training or involving any personal risk. Keep unnecessary and unprotected personnel away from the spillage. Wear protective clothing as described in Section 8 of this safety data sheet. Follow precautions for safe handling described in this safety data sheet. Wash thoroughly after dealing with a spillage. Ensure procedures and training for emergency decontamination and disposal are in place. Do not touch or walk into spilled material. Avoid contact with skin and eyes. Use protective equipment appropriate for surrounding materials.   |
|--|---|
| Environmental precautions              |   |
| Environmental precautions              | Harmful to aquatic life with long lasting effects. Immiscible with water. Large Spillages: Inform the relevant authorities if environmental pollution occurs (sewers, waterways, soil or air).  |
| Methods and material for cont          | ainment and cleaning up   |
| Methods for cleaning up                | Wear protective clothing as described in Section 8 of this safety data sheet. Clear up spills immediately and dispose of waste safely. Avoid generation and spreading of dust. Small Spillages: Remove spillage with vacuum cleaner or collect with a shovel and broom, or similar. Large Spillages: If leakage cannot be stopped, evacuate area. Remove spillage with vacuum cleaner or collect with a shovel and broom, or similar. Collect and place in suitable waste disposal containers and seal securely. Flush contaminated area with plenty of water. Wash thoroughly after dealing with a spillage. Dispose of waste to licensed waste disposal site in accordance with the requirements of the local Waste Disposal Authority. |
| Reference to other sections            | For personal protection, see Section 8. See Section 11 for additional information on health hazards. See Section 12 for additional information on ecological hazards. For waste disposal, see Section 13.   |
| 7. Handling and storage                |   |
| Precautions for safe handling          |   |
| Usage precautions                      | Read and follow manufacturer's recommendations. Wear protective clothing as described in<br>Section 8 of this safety data sheet. Keep away from food, drink and animal feeding stuffs.<br>Handle all packages and containers carefully to minimize spills. Keep container tightly sealed<br>when not in use. Do not handle until all safety precautions have been read and understood.<br>Do not handle broken packages without protective equipment. Do not reuse empty containers.<br>Avoid contact with used product.  |
| Advice on general occupational hygiene | Wash promptly if skin becomes contaminated. Take off contaminated clothing and wash before reuse. Wash contaminated clothing before reuse. Do not eat, drink or smoke when using this product. Wash at the end of each work shift and before eating, smoking and using the toilet. Change work clothing daily before leaving workplace.   |

| Conditions for safe storage, including any incompatibilities  |  |  |  |
|---|--|--|--|
| Storage precautions   | Store away from incompatible materials (see Section 10). Store in accordance with local regulations. Keep only in the original container. Keep container tightly closed, in a cool, well ventilated place. Keep containers upright. Protect containers from damage.  |  |  |
| Storage class   | Chemical storage.  |  |  |
| Specific end uses(s)  |  |  |  |
| Specific end use(s)   | The identified uses for this product are detailed in Section 1.  |  |  |
| 8. Exposure Controls/persona  | I protection   |  |  |
| Control parameters  |  |  |  |
| Occupational exposure limits  |  |  |  |
| Comments  | The following constituents are the only constituents of the product which have a PEL, TLV or other recommended exposure limit. At this time, the other constituents have no known exposure limits.   |  |  |
| The following exposure limits a<br>Long-term exposure limit (8-ho<br>Short-term exposure limit (15- | our TWA): 5 mg/m³  |  |  |
| Exposure controls   |  |  |  |
| Appropriate engineering controls  | Provide adequate ventilation. Personal, workplace environment or biological monitoring may<br>be required to determine the effectiveness of the ventilation or other control measures and/or<br>the necessity to use respiratory protective equipment. Use process enclosures, local exhaust<br>ventilation or other engineering controls as the primary means to minimize worker exposure.<br>Personal protective equipment should only be used if worker exposure cannot be controlled<br>adequately by the engineering control measures. Ensure control measures are regularly<br>inspected and maintained. Ensure operatives are trained to minimize exposure.   |  |  |
| Eye/face protection   | Eyewear complying with an approved standard should be worn if a risk assessment indicates eye contact is possible. Personal protective equipment for eye and face protection should comply with OSHA 1910.133 and/or the Canadian regulation on health and safety at work, SOR/86-304, Part XII (12.6), and any relevant provincial regulation relating to health and safety at work. Unless the assessment indicates a higher degree of protection is required, the following protection should be worn: Tight-fitting safety glasses.  |  |  |
| Hand protection   | Chemical-resistant, impervious gloves complying with an approved standard should be worn if a risk assessment indicates skin contact is possible. The most suitable glove should be chosen in consultation with the glove supplier/manufacturer, who can provide information about the breakthrough time of the glove material. To protect hands from chemicals, gloves should comply with OSHA 1910.138 and/or the Canadian regulation on health and safety at work, SOR/86-304, Part XII (12.9), and be demonstrated to be impervious to the chemical and resist degradation. Considering the data specified by the glove manufacturer, check during use that the gloves are retaining their protective properties and change them as soon as any deterioration is detected. Frequent changes are recommended. |  |  |
| Other skin and body protection  | Appropriate footwear and additional protective clothing complying with an approved standard should be worn if a risk assessment indicates skin contamination is possible.  |  |  |
| Hygiene measures  | Provide eyewash station and safety shower. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reuse. Clean equipment and the work area every day. Good personal hygiene procedures should be implemented. Wash at the end of each work shift and before eating, smoking and using the toilet. When   |  |  |

# Order by Phone 1-800-956-5695 - Give Operator Reference #5659349

out. Warn cleaning personnel of any hazardous properties of the product.

using do not eat, drink or smoke. Preventive industrial medical examinations should be carried

**Respiratory protection** Respiratory protection complying with an approved standard should be worn if a risk assessment indicates inhalation of contaminants is possible. Ensure all respiratory protective equipment is suitable for its intended use and is NIOSH approved. Check that the respirator fits tightly and the filter is changed regularly. Full face mask respirators with replaceable filter cartridges should comply with OSHA 1910.134 and/or the Canadian regulation on health and safety at work, SOR/86-304, Part XII (12.7), and any relevant provincial regulation relating to health and safety at work. Gas and combination filter cartridges should comply with OSHA 1910.134 and/or the Canadian regulation relating to health and safety at work. Half mask and quarter mask respirators with replaceable filter cartridges should comply with OSHA 1910.134 and/or the Canadian regulation on health and safety at work. SOR/86-304, Part XII (12.7), and any relevant provincial regulation relating to health and safety at work. Half mask and quarter mask respirators with replaceable filter cartridges should comply with OSHA 1910.134 and/or the Canadian regulation on health and safety at work, SOR/86-304, Part XII (12.7), and any relevant provincial regulation relating to health and safety at work. Half mask and quarter mask respirators with replaceable filter cartridges should comply with OSHA 1910.134 and/or the Canadian regulation on health and safety at work, SOR/86-304, Part XII (12.7), and any relevant provincial regulation relating to health and safety at work.

Environmental exposure Keep container tightly sealed when not in use. controls

|   |   |

#### 10. Stability and reactivity

| 10. Stability and reactivity  |   |
|---|---|
| Reactivity  | See the other subsections of this section for further details.  |
| Stability   | Stable at normal ambient temperatures and when used as recommended. Stable under the prescribed storage conditions.   |
| Possibility of hazardous reactions                                  | No potentially hazardous reactions known.   |
| Conditions to avoid   | There are no known conditions that are likely to result in a hazardous situation.   |
| Materials to avoid  | Oxidizing agents. Acids - oxidizing.  |
| Hazardous decomposition products                                    | Does not decompose when used and stored as recommended. Thermal decomposition or combustion products may include the following substances: Harmful gases or vapors. |
| 11. Toxicological information                                       |   |
| Information on toxicological eff                                    | fects   |
| Acute toxicity - oral<br>Notes (oral LD₅o)                          | Based on available data the classification criteria are not met.  |
| Acute toxicity - dermal<br>Notes (dermal LD <sub>50</sub> )         | Based on available data the classification criteria are not met.  |
| Acute toxicity - inhalation<br>Notes (inhalation LC <sub>50</sub> ) | Based on available data the classification criteria are not met.  |
| Skin corrosion/irritation<br>Animal data                            | Based on available data the classification criteria are not met.  |
| Serious eye damage/irritation<br>Serious eye damage/irritation      | Causes serious eye irritation.  |
| Respiratory sensitization<br>Respiratory sensitization              | Based on available data the classification criteria are not met.  |
| Skin sensitization<br>Skin sensitization                            | Based on available data the classification criteria are not met.  |
| Germ cell mutagenicity<br>Genotoxicity - in vitro                   | Based on available data the classification criteria are not met.  |
| Carcinogenicity<br>Carcinogenicity                                  | Based on available data the classification criteria are not met.  |
| IARC carcinogenicity  | None of the ingredients are listed or exempt.   |
| Reproductive toxicity<br>Reproductive toxicity - fertility          | Based on available data the classification criteria are not met.  |
| Reproductive toxicity -<br>development                              | Based on available data the classification criteria are not met.  |
| Specific target organ toxicity -                                    | single exposure   |
| STOT - single exposure  | Not classified as a specific target organ toxicant after a single exposure.   |
|   |   |

| Specific target organ toxicity -       | repeated exposure  |  |
|--|--|--|
| STOT - repeated exposure               | Not classified as a specific target organ toxicant after repeated exposure.  |  |
| Aspiration hazard<br>Aspiration hazard | Based on available data the classification criteria are not met.   |  |
| General information                    | The severity of the symptoms described will vary dependent on the concentration and the length of exposure.  |  |
| Inhalation                             | Prolonged inhalation of high concentrations may damage respiratory system.   |  |
| Ingestion                              | May cause discomfort if swallowed.   |  |
| Skin Contact                           | Prolonged skin contact may cause temporary irritation. Repeated exposure may cause skin dryness or cracking.   |  |
| Eye contact                            | A single exposure may cause the following adverse effects: Redness. Irritation.  |  |
| Route of exposure                      | Ingestion Inhalation Skin and/or eye contact   |  |
| Target Organs                          | No specific target organs known.   |  |
| Medical considerations                 | Skin disorders and allergies.  |  |
| 12. Ecological Information             |  |  |
| Toxicity                               | Harmful to aquatic life with long lasting effects.   |  |
| Persistence and degradability          |  |  |
| Persistence and degradability          | The degradability of the product is not known.   |  |
| Bioaccumulative potential              |  |  |
| Bio-Accumulative Potential             | No data available on bioaccumulation.  |  |
| Partition coefficient                  | Not available.   |  |
| Mobility in soil                       |  |  |
| Mobility                               | The product is insoluble in water.   |  |
| Other adverse effects                  |  |  |
| Other adverse effects                  | None known.  |  |
| 13. Disposal considerations            |  |  |
| Waste treatment methods                |  |  |
| General information                    | The generation of waste should be minimized or avoided wherever possible. Reuse or recycle products wherever possible. This material and its container must be disposed of in a safe way. Disposal of this product, process solutions, residues and by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any local authority requirements. When handling waste, the safety precautions applying to handling of the product should be considered. Care should be taken when handling emptied containers that have not been thoroughly cleaned or rinsed out. Empty containers or liners may retain some product residues and hence be potentially hazardous. |  |
| Disposal methods                       | Do not empty into drains. Dispose of surplus products and those that cannot be recycled via a licensed waste disposal contractor. Waste, residues, empty containers, discarded work clothes and contaminated cleaning materials should be collected in designated containers, labeled with their contents. Incineration or landfill should only be considered when recycling is not feasible.  |  |

| 14. Transport information   |   |  |
|---|---|--|
| General   | The product is not covered by international regulations on the transport of dangerous goods (IMDG, IATA, DOT, TDG).   |  |
| UN Number   |   |  |
| Not applicable.   |   |  |
| UN proper shipping name   |   |  |

| Naphthalene<br>0.1 %  |   |  |
|   | 9/12  |  |

Phosphorodithioic acid, O,O-di-C1-14-alkyl esters, zinc salts 1.0 % Dibutyl phthalate 1.0 %

CAA Accidental Release Prevention

None of the ingredients are listed or exempt.

#### SARA (311/312) Hazard Categories

None of the ingredients are listed or exempt.

#### **OSHA Highly Hazardous Chemicals**

None of the ingredients are listed or exempt.

#### **US State Regulations**

# California Proposition 65 Carcinogens and Reproductive Toxins

The following ingredients are listed or exempt:

#### Naphthalene

Known to the State of California to cause cancer.

*Dibutyl phthalate* Known to the State of California to cause developmental, female and male reproductive toxicity.

#### California Air Toxics "Hot Spots" (A-I)

The following ingredients are listed or exempt:

#### Naphthalene

Dibutyl phthalate

#### California Air Toxics "Hot Spots" (A-II)

None of the ingredients are listed or exempt.

#### California Directors List of Hazardous Substances

The following ingredients are listed or exempt:

Naphthalene

Dibutyl phthalate

#### Massachusetts "Right To Know" List

The following ingredients are listed or exempt:

Naphthalene

Dibutyl phthalate

#### Rhode Island "Right To Know" List

The following ingredients are listed or exempt:

Naphthalene

Dibutyl phthalate

#### Minnesota "Right To Know" List

The following ingredients are listed or exempt:

Naphthalene

Dibutyl phthalate

#### New Jersey "Right To Know" List

The following ingredients are listed or exempt:

Naphthalene

Dibutyl phthalate

#### Pennsylvania "Right To Know" List

The following ingredients are listed or exempt:

Naphthalene

Dibutyl phthalate

#### Inventories

#### Canada - DSL/NDSL

All the ingredients are listed or exempt.

#### US - TSCA

All the ingredients are listed or exempt.

#### US - TSCA 12(b) Export Notification

None of the ingredients are listed or exempt.
